UPDATE

To the individuals we support, their families and our community partners,

In continuing with our practice of providing you with regular and transparent communication, I once again want to provide you some relevant information.

I wanted to update you that a staff working within our residential programs at Fly Road has tested positive for COVID-19. We are wishing this staff member all the best for a speedy recovery. Since receiving notification of such, we have been working diligently with Public Health and I am pleased to communicate that at this time this is the only confirmed case of COVID-19 we have. We will continue to work with Public Health to minimize the effects of this situation on others.

As always, if you have any questions please contact Bethesda in the manner you have in the past or contact questions@bethesdaservices.com and we will make sure that someone responds to you as soon as possible.

Respectfully,

Brian Davies
